JSON VIEWER/EDITOR

DATE CREATED: 6/29/2022

WRITTEN BY: HEATHER PARRETT

REQUIRED SOFTWARE

- PySide2
- Python

INTRODUCTION

This tool allows you to open, edit, save, and delete JSON files. Includes error highlighting and cursor tracking functionality.
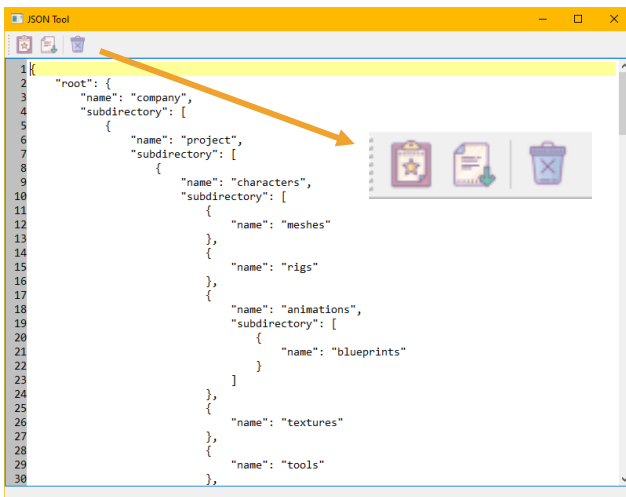

SETUP

To install Python: https://wiki.python.org/moin/BeginnersGuide/Download

Once Python is installed, navigate to your command line and run the following:

```
> pip install PySide2
```

For more information about PySide2, please follow this link: https://pypi.org/project/PySide2/
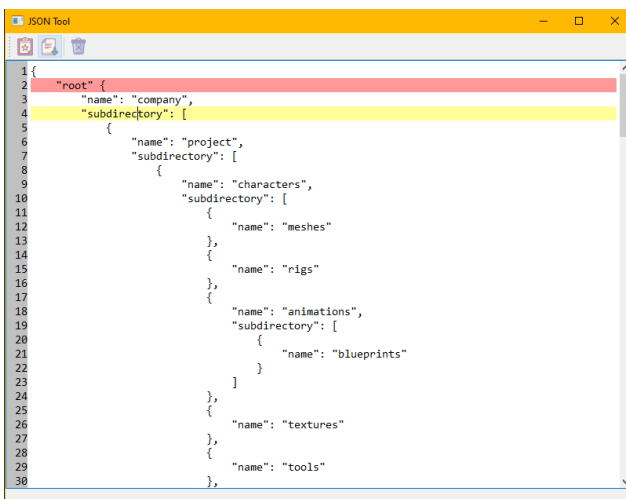

USAGE

TOOL BAR

- **Save** – Save your newly created and edited JSON files.
- **Load** – Load in a JSON file to begin editing.
- **Delete** – Delete JSON files from system and clear editor.

FUNCTIONALITY

- Tracks cursor position
- Highlights errors

START PROGRAM

- Open your favorite terminal
- Run the following command to launch the editor:

```
> python path/to/install/main.py
```
